

DST Domestic Workflow

Full process documentation File -

saved to [\\swna.wdpr.disney.com](https://swna.wdpr.disney.com)data\Corp-Tax\Corporate Tax Compliance\Digital Services Tax Database\Deliverables\Domestic

General Information

Created By - Alex Schmitt

Description – This workflow ingests, processes, and standardizes data from Snowflake, GAM Reports, and SAP/EDP in order to provide figures for revenue allocations to various tax jurisdictions.

Gallery Collection - Tax Technology

Scheduled in Server - N/A

WorkFlow Detail

Inputs

The workflow is designed to run data for the full year, using whatever data is available at run time.

In order to run properly, the workflow requires a folder with specific files and naming conventions. The folder should be named for the year being processed (IE, "2025"), and must contain the inputs listed below.

- Main File

- Location of File - \\swna.wdpr.disney.com\data\Corp-Tax\Corporate Tax Compliance\Digital Services Tax Database\Data\Domestic
- Description - The workflow uses the mapping tables provided to pull in and summarize the impression and revenue for the current data
- Requires File Browse - No - pulled using a directory input tool and then a filter tool to pull the correct file
- Requirements - must be a .xlsx file, with the name ending in "_DST_YYYY" (IE, "Domestic_DST_2025.xlsx"). This file must also contain the expected mapping tables:

- GAM Report

- Location of File - In the Raw GAM Reports folder in the period subfolder in \\swna.wdpr.disney.com\data\Corp-Tax\Corporate Tax Compliance\Digital Services Tax Database\Data\Domestic
- Description - Google Ad Manager Impression reports by month
- Requires File Browse - No - pulled using a directory input tool and then a filter tool to pull the correct file
- Requirements - The folder must contain "GAM Report" in the folder name.

Outputs

- Main File

- Location of Output - In the subfolder for each period in \\swna.wdpr.disney.com\data\Corp-Tax\Corporate Tax Compliance\Digital Services Tax Database\Data\Domestic
- Description - Domestic DST workpaper file with data written to the Revenue Data, Unmapped Ad Units, and Unmapped CoCodes tabs

- Impression Data written to csv

- Location of Output - In the subfolder for each period in \\swna.wdpr.disney.com\data\Corp-Tax\Corporate Tax Compliance\Digital Services Tax Database\Data\Domestic
- Description - Due to data volume (12m+ records), impression data is written to a large CSV file instead of to Excel. The Main File uses PowerQuery to connect to the CSV and show data in Pivot Tables

- Summarized data written to Data Hub Collections

- Location of Output - Data Hub
- Description - This data is used to power the reporting dashboard

Blueprint	DS_BP_DST_Domestic_Data	Data Schema	Type	Description	Example Values
SchemaID	DS_BP_DST_Domestic_Data	Year	Number	Year	2025
Collection	DS_BP_DST_Domestic_Data	Month	Number	Month	1
Collection ID	17064	Month and Year	String	Formatted string for period	2025-01
		Ad Unit	String	Ad Unit	24inchres
		Mapped Entry	String	Mapped field (Revenue mapped from CoCode to Entry, Impressions mapped from Ad Unit to Entry)	Other
		Country	String	Country - Not currently available	[Null]
		City	String	City - Not currently available	WV
		City	String	City - Not currently available	[Null]
		Application	String	Future field to provide more granular insight into ad sources - Not currently available	[Null]
		Amount in Group Curr.	Number	Revenue amount before apportionment	4528284.9
		Impressions	Number	Revenue to calculation	1
		Denominator without NA	Number	Denominator without NA-flagged records	757034104
		Denominator with NA	Number	Denominator with NA-flagged records	771482017
		Percent without NA	Number	Calculated percent from numerator and denominator	2.55E-09
		Percent with NA	Number	Calculated percent from numerator and denominator	2.55E-09
		Apportioned Amount without NA	Number	Revenue amount multiplied by percentage	0.02
		Apportioned Amount with NA	Number	Revenue amount multiplied by percentage	0.02
		Placeholder 1	Text	General purpose placeholder in case other fields are needed in the future, to avoid having to rename the Data Hub Collection	[Null]
		Placeholder 2	Text	General purpose placeholder in case other fields are needed in the future, to avoid having to rename the Data Hub Collection	[Null]
		Placeholder 3	Text	General purpose placeholder in case other fields are needed in the future, to avoid having to rename the Data Hub Collection	[Null]

Error Messages

Macros/API/Python/Email

- EDP - SQL Query

- Uses Alteryx Macro to pull data, with Account, CoCode and Business area criteria taken from "EDP Criteria" tab of the Main file.

	A	B	C	D
1	Account	CoCode	Business Areas	
2	400992	5004	533	
3	400994	1218		
4	405090	1225		
5	406992	1504		
6	400116	1546		
7	400135	1044		
8		5095		
9		5319		
10		5024		
11		2004		
12		1616		
13		1923		
14		5012		

- Snowflake Impressions Query

- Database query of the domestic ad impression data in Snowflake tables
- Requires a start date and end date parameter, which is generated based on the year in the Main File name
- Impression data is summarized to reduce record count

Server Interface

- Text Box
 - Provide path to source data for the period

Run Workflow

Alex Schmitt's Studio / DST Domestic Workflow v0.8.yxwz / Run Workflow

Questions

Questions

Provide full UNC path to shared drive folder (should match format of default value below)

\\swna.wdpr.disney.com\data\Corp-Tax\Corporate Tax Compliance\Digital Services Tax Database\Data\Domestic\2025
